

SPEC Data Visualization Workshop: Homework 1

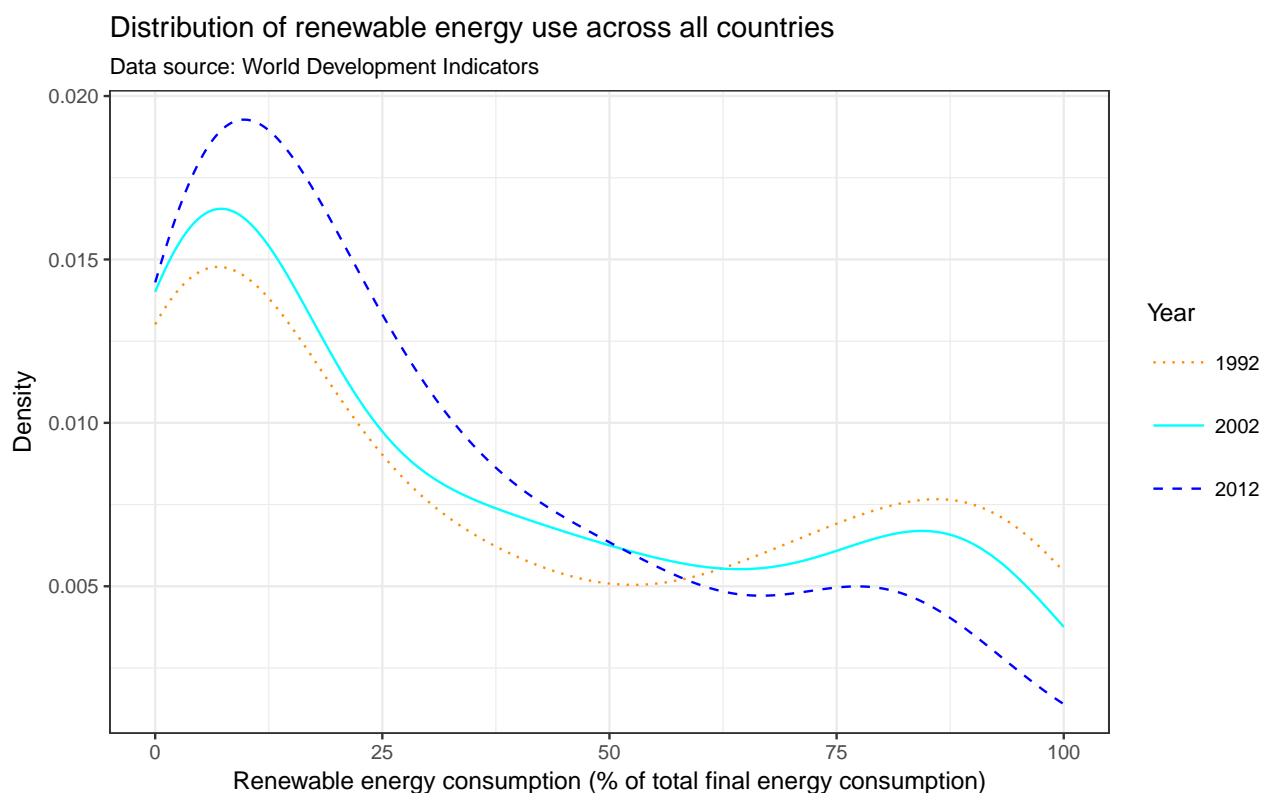

Therese Anders

April 7, 2017

Instructions: Re-create the graphs as close as possible. Pay attention to detail, such as the scaling and labeling of the axes, the linetypes used, the background of the plot, or the legends. Try to match the colors as closely as possible, but deviations are ok.

Some skills required to re-create the graphs were not covered in class. You will have to google to complete the homework. Please feel free to work in groups and seek help from your peers.

Graph 1

Graph 2

Per capita energy consumption between 1992 and 2014

Data source: World Development Indicators
